Sustainable agriculture through novel pesticides using an integrated approach

Josep Massana-Codina, Brice Dupuis, Paul Dahlin, Thomas Steinger, Lucius Tamm

17 Janvier 2025

Sustainable agriculture through novel pesticides using an integrated approach

- **Projet EU** du call CL6-2023-FARM2FORK-01-7 “Innovations in plant protection: alternatives to reduce the use of pesticides focusing on candidates for substitution (CfS)”

- Réduction de l’utilisation de pesticides en pomme de terre et betterave dans 5 régions européennes, avec un focus sur les « CfS »

- Janvier 2024 – Décembre 2028

- 10 partenaires (recherche et industrie)

Candidates for Substitution

12.3.2015 EN Official Journal of the European Union L 67/21

ANNEX

1-methylcyclopropene
aclonifen
amitrole
bifenthrin
bromadiolone
bromuconazole
carbendazim
chlorotoluron (unstated stereochemistry)
copper compounds (variants copper hydroxide, copper oxychloride, copper oxide, Bordeaux mixture and tribasic copper sulphate)
cyproconazole
cyprodinil
diclofop
difenacoum
difenoconazole
diflufenican
dimethoate
dimoxystrobin
diquat
epoxiconazole
esfenvalerate
ethoprophos
etofenprox
etoxazole
famoxadone
fenamiphos
fenbutatin oxide
fipronil
fludioxonil
flufenacet
flumioxazine
fluometuron
fluopicolide
fluquinconazole
glufosinate
haloxyfop-P
imazamox
imazosulfuron
isoproturon
isopyrazam
lambda-cyhalothrin
lenacil

L 67/22 EN Official Journal of the European Union 12.3.2015

linuron
lufenuron
mecoprop
metalaxyl
metam
metconazole
methomyl
metribuzin
metsulfuron-methyl
molinate
myclobutanil
nicosulfuron
oxadiargyl
oxadiazon
oxamyl
oxyfluorfen
paclobutrazol
pendimethalin
pirimicarb
prochloraz
profoxydim
propiconazole
propoxycarbazone
prosulfuron
quinoxyfen
quizalofop-P (variant quizalofop-P-tefuryl)
sulcotrione
tebuconazole
tebufenpyrad
tepraloxydim
thiacloprid
tri-allate
triasulfuron
triazoxide
warfarin
ziram

A new variant of the late blight pathogen Phytophthora infestans is threatening the potato production

The results of a study on late blight show 100% resistance to one of the most important fungicides in potato production. Researchers find the development of the new variant of late blight worrying in relation to future control in Danish fields.

Partenaires du projet SAGROPIA

RTDS GROUP

Confirm the Efficacy of SAGROPIA Solutions

Supply Affordable Biopesticides with Known Mode of Action

Develop and validate alternative SAGROPIA integrated pest management (IPM) strategies

Test and exhibit the newly developed integrated pest management (IPM) strategies in large-scale field trials

Assess the overall sustainability of alternative integrated pest management (IPM) strategies
